### Mark 70E Draft Gear

The Cardwell Westinghouse Mark 70E Draft Gear is quickly becoming the new industry standard in train energy management. Like the proven Mark 50, the Mark 70E offers superior durability and reliability in a light weight, all steel friction, AAR M-901-E draft gear. Additionally, the Mark 70E delivers the same level of optimum performance needed to protect all types of 286K GRL freight cars from the punishing impacts of train action.

Thousands of Mark 70E draft gears are in service on tank, hopper and coal cars. With nearly two years of service, field inspections show The Mark

70E Draft Gears are performing well without exception. The pictures above and below are representative of recent inspections showing that the gears are in excellent condition.

Visit us at our website [www.wabtec.com](http://www.wabtec.com) and make the Mark 70E your Draft Gear of choice. Contact your Wabtec Sales Manager today for more details.
