TMX® – Truck Mounted Brake

Cardwell Westinghouse Truck Mounted Brakes stand out in their field as the best in class. Their lightweight, versatile design makes them the ideal choice for many freight car applications. And now more proof is in on their exceptional durability.

With over 900,000 miles in heavy axle load service, the TMX® components shown here are from a long series of cars with TMX® brakes that have gone the distance. This set was selected at random with four others to help gage TMX® life at this time.

The jaws, trigger pin, bearings, seals, rods, spring, and housings were all in good working order...

...as were the cylinder, and brake beam components. And, all TMX® brake components are designed to be easily reconditioned. Just call Cardwell, for all your TMX® reconditioning needs.

When you decide on truck mounted brakes for your cars, visit us at our website www.wabtec.com and make TMX® your brake set of choice. Contact your Wabtec Sales Manager today for more details.
