## Product Bulletin

### Barber S-2-E – Shear Pads – Coal Service

This S-2-E Truck with Split Wedges and Shear Pads has been in service for over **700,000 miles** on a high side coal gondola.

The Shear Pads continue to deliver nearly twice the wheel life of conventional adapters.

The wedge rise is only  $\frac{1}{4}$ " , leaving  $\frac{1}{2}$ " more life before reaching replacement height. That indicates another **1,400,000 miles** before repair!

The Split Wedges continue to outperform, wearing just 1% in the last **100,000 miles**!

Get the same great performance and durability on a standard pedestal S-2-E truck with the **Barber S2-86™** Radial Adapter!

Contact your SCT Sales Manager today, and specify S-2-E for your next coal car build.
