S-2-E and Shear Pads in Box Car Service

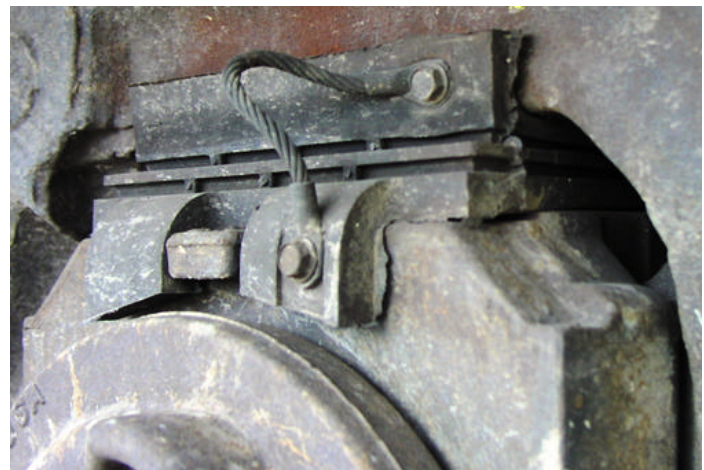

The Barber S-2-E trucks with Split Wedges and Shear Pads shown here have been in Western box car service for **five years**. They are on a series of 550 286K GRL box cars built in 2002 and 2003.

A spot check of 184 **Shear Pads** shows that they have endured over **135,000 miles** of this demanding service with no noticeable change.

Wedge rise data taken on 23 car sets of the patented **Split Wedge** show that they are in excellent condition with an estimated **30+ years** of life remaining.

The **S-2-E** Barber Stabilized Trucks with **Split Wedge** and with **Standard Wedge** are also approved for use with the **Barber S2-86™** Radial Adapter. Contact your SCT Sales Manager today, and specify S-2-E trucks for your next new car build.
