Barber S-2-E in Canadian Coal Service

This S-2-E Truck with Split Wedges and Shear Pads has been in coal service for over **500,000 miles** on a high side gondola.

The Friction Wedges, Pocket Inserts, and Column Wear Plates continue to provide exceptional performance and durability. Based on our recent inspection, all the key components shown here should have well over **1,300,000 miles** of life left in them!

The Split Wedges, in particular, are trending to very long life. Measurements indicate that these 945's are the most durable wedges available!

The Shear Pads are in excellent condition, steering the wheels to the kind of mileage previously made only by Frame Brace trucks.

Specify S-2-E trucks on your next coal train.
