Barber S-2-E Split Wedge in Coal Service

This S-2-E Barber Stabilized Truck with Split Wedges and Pedestal Shear Pads has been in Western coal service for 390,000 miles on a high side aluminum gondola car.

The Friction Wedges, Pocket Inserts, and Column Plates are providing exceptional performance and durability. Based on inspection data, these key components have well over 900,000 miles of life left in them!

Key bearing surfaces including thrust lugs, pedestals, gibs and column guides show little to no wear. From billing data, Shear Pad steering helped provide 350,000 miles of wheel service, with no shelling removals!

The Shear Pads are in excellent condition, showing every indication that they are good for the million mile long and heavy haul.

Specify S-2-E trucks on your next car build.
