### 'Maintenance Free' with ZefTek Grey...

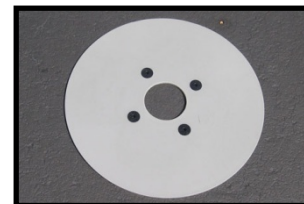

**ZefTuf® CFR-P (Cold Flow Resistant-Premium) Material**

*ZT-350, 16" Full Bowl Liner for 2" deep bolster bowls.*

*ZT-351, 16" Full Bowl Liner for 2-1/4" deep bolster bowls.*

*ZT-561, 16" Horizontal Liner*

### Bowl Liners \* 600K+ Miles \* Coal Car Service

Shown below are examples of ZT-351 bowls inspected after more than 600K miles of service.

The optimum friction properties of our ZefTuf®CFR-P material provides the ideal balance of curving and high-speed stability while demonstrating incredible resistance to wear and cold flow or creep. After 600K+ miles, inspection of the bottom and side walls showed less than 5% loss of the original thickness compared to new liners.

*Example of New Bowl Liner in Bolster*

*Bowl after 600K+ Service Miles*

Contact your SCT Sales Manager today and specify the ZefTek ZT-351 Bowl Liner for your next car build – and incorporate the ZT-351 into your maintenance program for bowl liner replacement.
