

Ensure AAR Compliance with Axlegard™ Axle Protectors

July 30, 2008 the AAR distributed circular C-10792* stating "All mounted wheel sets must be shipped using methods that prevent axle bodies and roller bearings from having metal to metal contact with load securement devices, other wheel sets, or any other metal objects". The ZefTek Axlegard™ provides a quick and easy snap-on layer of our durable Zeftuf® material preventing chain/axle contact as required by this addendum.

- Universal application accommodates all axle diameters and can be over-lapped for 100% coverage.
- Available in 6", 8", 10" or 40" re-usable lengths.
- Snap-fit design is quick and easy to apply.

Ensure compliance. Contact your SCT Sales Manager today for additional information on the ZefTek ZT-510 Series Axlegard™ Axle Protectors.

*AAR circular C-10792 refers to MSRP Section G, Part II WHEEL AND AXLE MANUAL. RP-632, Part 3.2.7 Handling and Shipping of Mounted wheels and Axles.
