Zeftek – Coupler Centering Device

Why put up with the trouble and expense of long shank coupler bypass damage, when the **Zeftek Coupler Centering Device** can prevent it? The CCD is proving to be the most reliable, cost effective, and easy to apply solution available, as demonstrated in this service trial setup and inspection.

The Zeftek CCD was applied to both ends of a refrigerated box car, in under 2 ½ hours, in June, 2008.

Since then, the CCD's have successfully accrued over 40,000 miles of service...

...and were returned to service after the inspection, to prevent more coupler bypass damage.

If long shank coupler bypass is a problem with your cars, visit us at our website www.wabtec.com and make the Zeftek CCD a part of your damage prevention routine. Contact your Wabtec Sales Manager today for more details.
